

I am truck driver and need instant information about where I am going and don't have time to try and find a local station and have to wade through all the commercials and other bull until I might hear the 10-15 second report. The radio stations use interstate names (I-81 ECT). XM uses the interstate number (I-81 ECT). I'm paying for this service and if you feel that XM should have this service removed then all radio stations should not be able to do traffic or weather reports and that TV and radio while we are at this let's also remove the weather channel in my opinion what is good for the goose is good for the gander. If you remove a service from one all will have to follow!!!!!!!!!!!!!!!!!!!!!!!!!!!!!! I feel that this is just one more time that some one is trying to interfere with the private sector. James W.
